Education

Benson Idahosa University
Electrical Engineering

Benin City, Edo State, Nigeria. • 2021 - 2026

Studying Electrical Engineering gave me a solid foundation in how systems work, but I found myself drawn more toward software, especially frontend development. For my final year project, I built an ESP32-based system for weather monitoring, accessible remotely without a router. Alongside my coursework, I taught myself React and Tailwind CSS and completed a nine-month frontend development internship.

Experience

NNPC
Intern

Abuja, Nigeria

April 2025 - September 2025

- Built a car park space management web interface, enabling users to securely sign in and reserve parking spots
- Translated a UI/UX designer's Figma design into a fully responsive landing page for the NNPC Inter-Company Loan platform using React and Tailwind CSS
- Gained hands-on experience with HTML, CSS, JavaScript, and React in a real-world development environment, while collaborating within a team

Projects

Extension Manager

July 2026

Built a browser extension management interface with React and Tailwind CSS, featuring dark mode, toggle-based activation, and quick removal controls for an efficient user experience.

Tip Calculator

March 2026

Created a responsive tip calculator that lets users enter a bill amount, choose a tip percentage, and instantly divide totals among several recipients.
